

Sprinkler Times Press FAQ

What is Garden Apps?

Garden Apps is an app development company that focuses on horticulture, landscaping, and irrigation apps, and offers 39 years in the landscaping and irrigation water management fields integrated with innovation for quality and high-utility apps.

What is Sprinkler Times?

Sprinkler Times is an easy to use smartphone app and online program that allows end users to easily and instantly calculate a customized watering schedule for their automated sprinkler systems so that lawns and gardens get an optimum amount of water all year long, anywhere in the United States.

How does Sprinkler Times work?

Users answer a few simple questions about their unique landscape (such as location, plant type, soil type, sun and shade conditions, and sprinkler type) and Sprinkler Times will calculate a customized monthly watering schedule that the user will program into their sprinkler box. The schedule will give the user the recommended number of minutes to water each zone, the number of days per week to water each zone, and number of run times for each zone.

What is the science behind Sprinkler Times?

Sprinkler Times Technology uses 20 years of historic weather data to calculate the average monthly weather for each user's particular zip code. Sprinkler Times combines the individual's unique data entries about their landscape (plant type, sprinkler type, soil type, and sun exposure) with local historic and evapotranspiration rates (evaporation rates + transpiration rates) to calculate the optimum water output for each zone in their landscape.

How much money has using Sprinkler Times Technology saved people?

Sprinkler Times Technology has reduced homeowner association's water usage by as much as 60% which resulted in thousands of dollars in water savings. And now we are bringing this technology to the individual homeowner.

Sprinkler Times can save individual homeowners hundreds of dollars each year, while reducing their water usage and contributing to the global water conservation efforts.

How much does Sprinkler Times cost?

Sprinkler Times is free to install when downloaded via the App Store and Android Market, and comes with the ability to program a single zone, giving users the opportunity to see firsthand the benefits that Sprinkler Times can offer. Once downloaded, users can make an in-app purchase for a single timer program (which includes 32 zones) for \$5.99. For users that have more than one timer, additional timers can be purchased for \$5.99 each.

When purchased directly via the Website, Sprinkler Times costs \$5.99 and give users access to up to 32 customizable zones for one timer program. For users that have more than one timer, additional timers can be purchased for \$5.99 each.

Why would users upgrade from the free single zone version to a multi-zone version?

With the upgraded app you gain access to 32 customizable zones.
